Transform Your Patient Files from Paper to Digital

PMI Technologies has several solutions to assist your office with electronic conversion of: Medical Records, Charts, Patient Files and Patient Billing

Notice to All Physicians, Administrators, & Office Managers

PMI Technologies is making it easy for you to transform your overload of hardcopy medical files into digital records so that you can allocate more of your time where it belongs: with your patients!

PMI has a variety of solutions, from back file scanning to full ERM and EPB systems, to assist your office with time and money savings.

Back File Scanning – PMI Technologies Highly Skilled Staff will...

- Come to your office and box up charts, plus we can provide you the boxes.
- Pick up your charts using company owned and insured vehicles to return to our secure facility for processing. (On-site scanning also available).
- Prepare, scan, quality check, and index each chart.
- Return to you an electronic media containing electronic digital charts for uploading to current EMR systems, or other format if EMR system is not available.

• Ask us about our new Scan-On-demand capabilities!

- Return the charts to you, store in our secure archival facility, or confidentially destroy the charts with your proper authorization and approval.

Chart Capture – Worldwide Leader in Capturing Chart History for EMR

- Have a complete color copy of chart history when you go live with EMR

CHART CAPTURE SYSTEM

- Reclaim dead chart storage space to fast-start your return on investment

- Eliminate recurring off-site storage expenses and costly retrieval fees

- Install months before your EMR rollout. Works with any EMR

Aquarius Software Pre-EMR Method to Go Paperless

Start saving up to \$75,000 a year by digitizing your charts. Sound too good to be true? Think again. These savings strike just the right chord. Check out these Aquarius solutions that will get you there.

- **TouchChart Harmony**
Using a high speed, duplex scanner combined with TouchChart Digital Charting System allows you to scan patients files, store X-Rays, and stream files for the price of your cell phone bill to access it all securely anytime, from anywhere.

- **TouchChart Symphony**
Symphony is an out-of-the-box solution for digitalizing patient charts. Get the HP TouchSmart touch-enabled PC, the HP ScanJet 7000 scanner and the TouchChart Digital Charting software to organize and secure your medical charts, giving you access to them anytime, from anywhere.

- **Key Features of Both**
 - Mirrors your current charting structure
 - One-touch batch scanning
 - Easy, yet sophisticated quality control
 - Instant access to patient history
 - Store static & streaming files
